

1VAC30-45 Laboratory Management Qualifications

Staff Member: _____ Job Title: _____

Laboratory Name & ID: _____ Date Started Position: _____

1VAC30-45-200 B provides 4 options to meet the qualification for Laboratory Manager for a certified laboratory. Please indicate the means by which the qualification has been met:

Environmental laboratory that performs only simple test procedures

NOTE: 1VAC30-45-40 defines "simple test procedures" as the following: Biochemical oxygen demand (BOD) or carbonaceous BOD (CBOD); Fecal coliform; Total coliform; Fecal streptococci; E. coli; Enterococci; Settleable solids (SS); Total dissolved solids (TDS); Total solids (TS); Total suspended solids (TSS); Total volatile solids (TVS); and Total volatile suspended solids (TVSS).

- No additional documentation is needed for this Laboratory Manager assignment.

Environmental laboratory that performs procedures beyond simple test procedures

- A laboratory manager shall have two years of experience managing an environmental laboratory or performing the analyses for which the environmental laboratory seeks certification or both
- Provide information supporting the required experience has been met:

RELEVANT EXPERIENCE:

Month/Year From – To	Name of Employer & City, State	Job Title & Description

- A full-time employee of a drinking water or wastewater treatment facility who holds a valid treatment plant operator's certificate appropriate to the nature and size of such facility shall be deemed to meet the educational and experience requirements serving as the laboratory manager of the certified laboratory devoted exclusively to the examination of environmental samples taken within such facility system and limited to the scope of that facility's regulatory permit.
- A full-time employee of an industrial waste treatment facility with a minimum of one year of experience under supervision in environmental analysis shall be deemed to meet the requirements for serving as the laboratory manager of a certified laboratory devoted exclusively to the examination of environmental samples taken within such facility for the scope of that facility's regulatory permit.
