

# eVA Extra

*Save  
the  
Date!*

The next BUG (Buyer User Group) meeting will be held Wednesday, June 26th. Keep an eye out of the meeting invitation, including agenda.

## *What's that Status Mean?*

### *The Difference Between Deactivated and Locked-Out*

Did you ever want to know the difference between the Statuses of Deactivated and Locked-Out? A user is put into Deactivated Status, when an administrator disables their account either because the user no longer needs access to it or they have left the entity. To regain access, a user would need to contact their Entity eVA Security Officer. eVA Customer Care can provide users with this information. An account becomes Locked-Out when too many invalid login attempts have been made. To gain access, the user would click on the Forgot Username/Password link on the homepage and follow the prompts.

## *Are you a Receiver? This is What You've Been Waiting for...*

The eVA Bureau is pleased to announce that receivers now have the ability to change the receiving date on multiple line items 'en mass' while receiving an order. This will help to speed up the process when earlier dates must be recorded on a receipt. Check out the new guide from the eMall Home page, accessible from your News Box, as illustrated below:
